## EXCLUSIVE INNOVATION

The most **POTENT** fat burning formulation  
of slimming candy in the market:  
**SUNZ AND MOONZ**

已投保一百万产品责任保险  
Insured 1 Million Product Liability Insurance

It is specially designed for an urban hustler to obtain a healthy and perfect body shape, especially those with busy and hectic lifestyles with no time for exercise.

It's packed with natural ingredients for an extraordinary fat burning effect, all within a tiny candy. With its remodeled and convenient yet visually appealing packing, slimming is certainly as easy as 1,2,3...

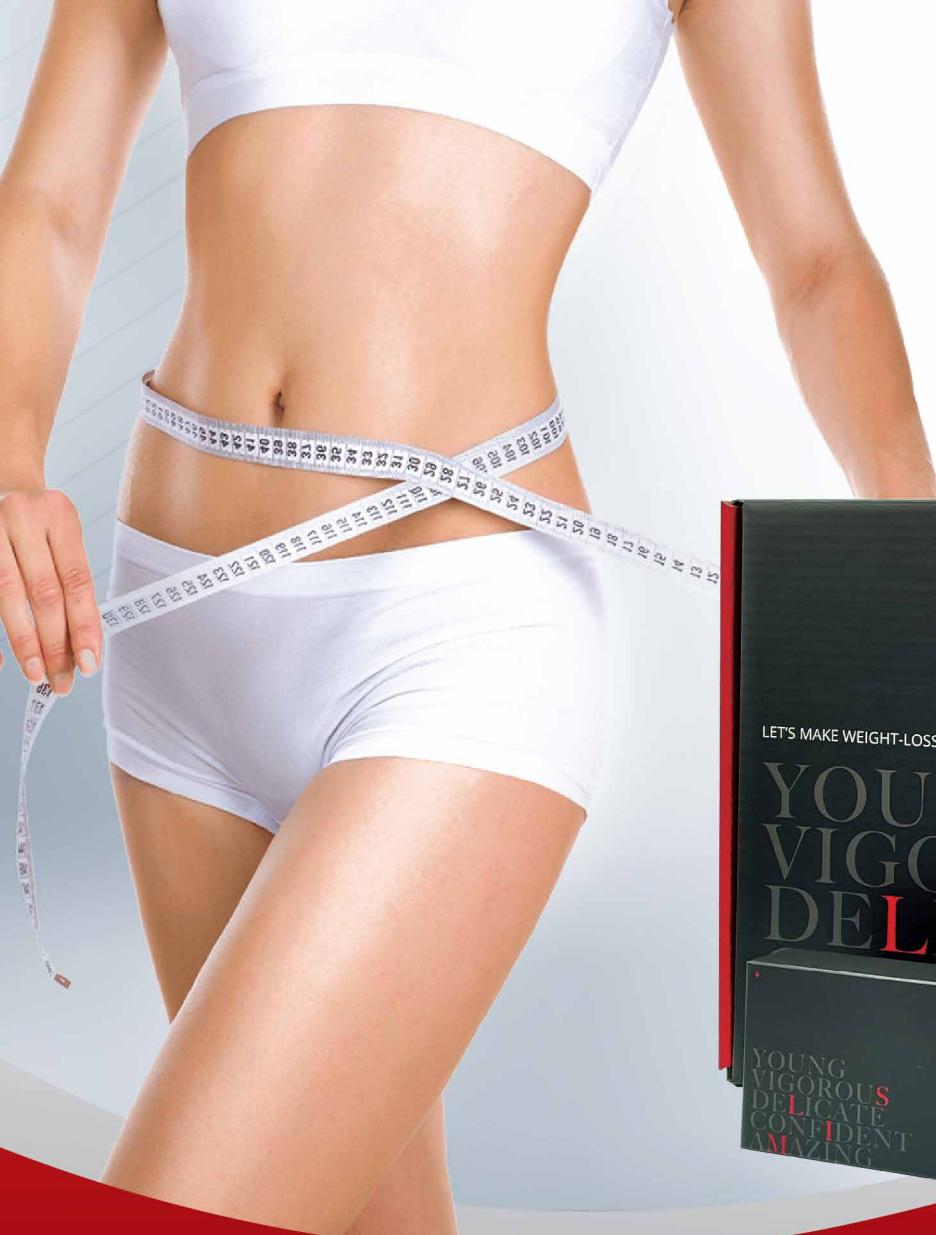

“Spot-slimming” is never a myth now with Urbanism. SUNZ & MOONZ are formulated in such a way to target a specific part of the body with stubborn adipose tissue such as the abdomen, lower abs & glutes. The mechanism adopted is perfectly healthy, effective, and scientifically proven.

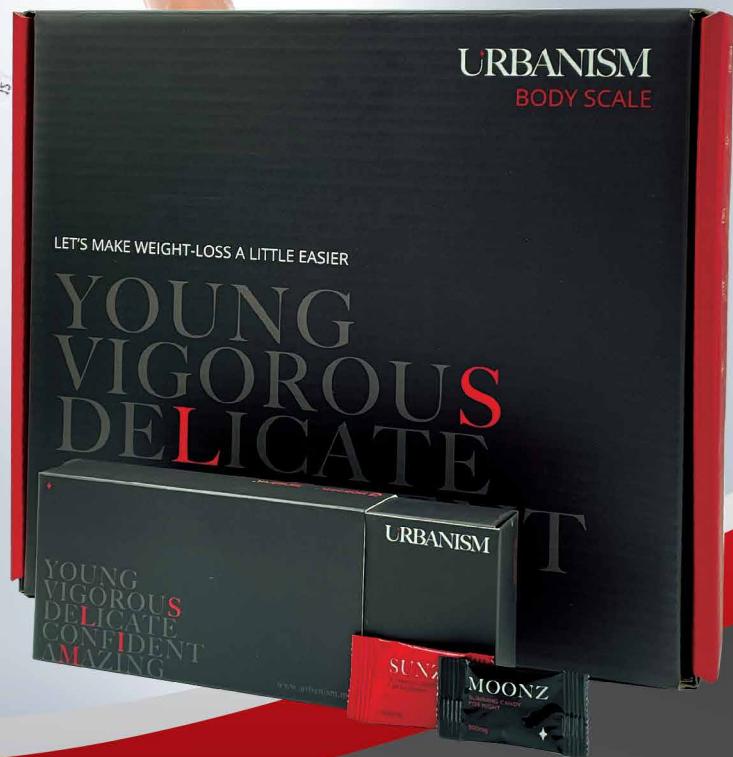

As a result, no Yo-yo's effect (weight-loss rebound issue).

Flatter tummy, smaller waist, slender hips and thighs all are now achievable with SUNZ & MOONZ!! You deserve a better body shape.

It has also received reputable accreditations from the following:

## What's visceral fat?

Body fat can be divided into subcutaneous fat & visceral fat. Both are harmful to your health if found in excessive amounts.

Visceral body fat is a build-up of intra-abdominal adipose tissue which surrounded our major organs like the liver, kidney, or intestine. Its a.k.a “hidden fat” is usually non-detectable by visual examination. They could make up to about 1/10 of your total body fat.

Visceral fat produces more harmful and toxic agents compare to other adipose tissue. This can be dangerous to your health if you have a greater visceral/subcutaneous fat ratio, even you may look thin externally. Clinical studies had shown that visceral fat is one of the major factors that contribute to diabetes, cardiovascular disease, neurodegenerative disease, and other problems.

# What causes visceral fat?

- Obesity
- Lack of exercise
- Sedentary lifestyle
- Improper eating habit
- Hormone's imbalance
- Chronic stress
- Genetic factor
- Alcoholism
- Smoking
- High-fat diet

高貴優雅包裝、便捷又實惠、純天然成分、非凡的效果，專為都市佳麗而設，讓生活忙碌又缺少運動的我們，活出的自己健康完美體態。

瘦身的概念比減肥來得更健康更理性，因此採取的方式也應該更科學。

既然瘦身是在雕塑完美的體型，那麼局部瘦身就是一個很重要的概念，例如減去小肚腩、美腿瘦腿、減去手臂拜拜肉、減少橘皮組織等等。

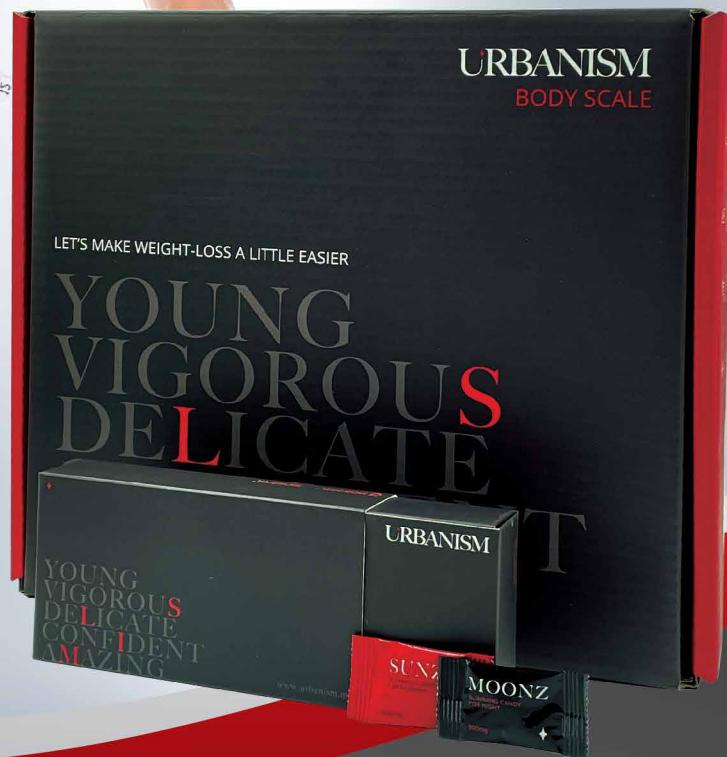

## URBANISM

纖體糖能讓身體更加苗條，  
由於健康有效不容易反彈，  
也收到廣泛的好評。

It has also received reputable

## 什麼是體脂肪

體脂肪又分為【皮下脂肪】和【內臟脂肪】。

皮下脂肪是指脂肪多堆積在下腹部、腰圍、臀圍等皮下組織。

內臟脂肪是指脂肪多堆積在內臟附近及胃腸周圍。

當我們體內營養過剩時，脂肪就會不斷堆積，造成脂肪過剩。脂肪過剩除了會導致肥胖問題，還會引發高血脂、高血壓、糖尿病、動脈硬化、心臟病等心腦血管疾病及代謝綜合徵，甚至增加中風和心肌梗死等急性心腦血管事件的發生風險。
